

# PHOTOSYNTHESIS.

## WORD BANK

VITAMIN D - PHOTO  
OXYGEN - SUGAR  
ROOTS- FOOD  
THE CHLOROPLASTS  
CARBON DIOXIDE  
SUNLIGHT- WATER  
SYNTHESIS  
PHOTOSYNTHESIS

1. Sunlight is a good source of \_\_\_\_\_.
2. Trees and plants make their food from \_\_\_\_\_

3. \_\_\_\_\_ is a Greek word for 'light' and  
\_\_\_\_\_ is a Greek word for 'putting together'.  
Now...it's simple! : \_\_\_\_\_ is using light  
to 'put things together'. Plants use this process to make  
their food with the help of SUNLIGHT, \_\_\_\_\_,  
and \_\_\_\_\_.

4. Plants have tiny openings called the STOMATA present in their leaves through which they take in \_\_\_\_\_ and give out \_\_\_\_\_. They also use WATER and other nutrients to make FOOD which is absorbed by their \_\_\_\_\_.

5. The LEAVES contain tiny pigments called \_\_\_\_\_. These pigments take in CARBON DIOXIDE, WATER and \_\_\_\_\_ and turn them into SUGAR and \_\_\_\_\_. The SUGAR is then used by the plants as their \_\_\_\_\_ and the \_\_\_\_\_ is given out into the atmosphere.

This process as a whole is called \_\_\_\_\_
