

CENTRAL NERVOUS WORKSHEET.

Name: _____

Date: _____

1. What is the function of the nervous system?

- a) to control and coordinate body functions and systems. b) to protect the body from harm.
- c) to identify pain and begin healing. d) to break down food.

2. Select all of the organs of the nervous system:

- a) Brain b) Heart
- c) Spinal Cord d) Nerves
- e) Stomach

3. Which of the following is the nervous system?

a)

b)

c)

d)

5. Which system controls all other body systems?

- a) Muscular b) Excretory
 c) Nervous d) Digestive

6. The basic unit of structure and function in the nervous system is a nerve cell. Nerve cells are also called-

- a) Osteocytes b) Dendrites
 c) Neurons d) Spinal Cords

7. What is the function of a nerve?

- a) To transport needed food around the body b) To control body movement for reflexes.
 c) To carry messages (impulses) to and from the Central Nervous System d) All of the above

8. The Central Nervous system includes what two organs?

- a) Brain and Nerves b) Brain and Spinal Cord
 c) Spinal cord and Nerves d) Nerves and Neurons

9. What controls the nervous system and all decision-making?

- a) Brain b) Spinal Cord
 c) Nerves d) Neurons

10. The column of tissue connecting the brain to nerves is...

- a) spinal cord b) central nervous system
 c) peripheral nervous system d) All of the above
