

# REPRODUCTIVE SYSTEMS

ONE. Write the name of each part of the reproductive systems in the correct box.

TWO. Complete the text with the words in exercise one.

The ..... produce the female cells. The ..... is where the baby grows. The ..... protects the female reproductive organs.

The ..... produce the male cells. The ..... is connected to the testicles by small tubes. The ..... is a tube in the penis..

When a female and male cell join together and make another cell, reproduction takes place.
