PROJECT 4 – WEEK 3- Steven Peñafiel

Recuerda: Este proyecto incluye actividades para cada semana, que podrás realizar con el apoyo de tu familia o individualmente, con la guía de tu profesora.

Topic: Food in space

Objective: to learn about astronauts and how they work.

Activity 1. Listen and Read the story.

Eating in space Astronauts have breakfast, lunch and dinner every day when they are in space,

and they can eat snacks if they feel hungry.

They eat similar food to what we eat on Earth.

The difference is that space scientists put the food in small packages to preserve it.

In addition, they dehydrate drinks and keep them in powder form in special packages.

It is more difficult to eat food in space because there is no gravity and the crumbs or small pieces of food can float away.

Activity 2.- Translate 4 sentences. (traduce 4 oraciones de las resaltadas)

Activity 3.- listen and answer the questions. (Escucha y contesta)

a. Do they eat similar food to what we eat on Earth?

b. Do space scientists put the food in small packages to preserve it?

c. Do you eat special food in your home?

Sólo Activity 2 realizarla en su hoja y cuaderno.

Enviado: 30 de noviembre

Para realizar según agenda: 4 de diciembre.

Entrega: 11 de diciembre del 2020

Acompañamiento de lunes a Viernes
