Live in	on land in water	on land in water	on land in water
Examples	Eathworms Starfish Sponges	Snail Mussels Octopus	Insect: ant Arachnid: spider Sponges: Jellyfish

	FISH 	AMPHIBIANS 	REPTILES 	BIRDS 	MAMMALS 
Their body is covered by			Dry skin and scales		Fur and hair
They breathe		Gills and lungs			
Reproduction					
Vertebrate or invertebrate?					

Plant reproduction

_____ reproduction	_____ reproduction
 a) _____ b) _____	 c) _____
The pollen joins an ovule to make a seed. This is called fertilisation. The pistil grows around the seed into a fruit.	Stems can grow along the ground. Buds grow from the stems into new plants.
