15.4.	the recovery of a place after an influx of tourists?	

SET-JETTING

The trend of travelling to locations featured in movies – commonly known as “set-jetting” – is a growing phenomenon in the tourism industry. Here are some of the most popular set-jetting destinations.

A. The Beach – Phi Phi Island, Thailand

Released in 2000, Danny Boyle's *The Beach* stars Leonardo DiCaprio as an inexperienced traveller in search of a utopian native community living on a fabled beach. *The Beach* was filmed in Maya Bay, the most popular beach on Phi Phi Island, located off Thailand's West coast. After the film's release, the island was flooded with tourists and their rubbish, but now it is slowly getting back to normal after the tidal wave. With its azure waters and surrounding limestone cliffs, Maya Bay certainly won't disappoint any set-jetters who want to follow in DiCaprio's footsteps, go snorkelling or explore the mystical coves of this exotic destination.

B. 127 Hours – Moab, Utah

127 Hours is a gripping, 2010 Oscar-nominated movie about a young climber who gets trapped in a thin crevice of the Blue John Canyon. The movie was partly filmed in the Canyonlands National Park, Utah. When the movie hit the theatres, there was a continuous influx of tourists wishing to visit the canyon. However, it's an isolated area and to explore it, you must be an experienced canyoneer. Otherwise, its exploration requires the assistance of a guide. A major let-down for many set-jetters is that the pristine cave pool from the movie doesn't really exist, at least not within the Canyonlands National Park.

C. The Lord of the Rings – Tongariro National Park, New Zealand

The Lord of the Rings location of Mordor was shot on and around the rocky slopes of the Tongariro National Park. The area's jagged volcanic rock formations and dramatic barren landscapes were perfect for creating Mordor's wasteland. The beautiful Mount Ngauruhoe was digitally transformed to create the fiery Mount Doom, the centre of Frodo's quest to save Middle-earth. The summits of the volcanoes were not filmed out of respect for the Maori people to whom the peaks are sacred.
