

Task 1

- In this text about earthquakes, the questions have been removed.
- Your task is to match the questions (A- L) and the answers (1-8).
- There are two extra questions that you do not need.
- Write the letters in the white boxes as in the example (0).

FREQUENTLY ASKED QUESTIONS ABOUT EARTHQUAKES

- 0) _____
Rocks break and move in the earth. Energy is released, and that's what makes the ground shake.
- 1) _____
The slow deformation of "tectonic plates". The rocks can break suddenly, releasing the stored energy as an earthquake.
- 2) _____
The ground shaking may destroy buildings and hurt people.
- 3) _____
No. People wrongly believe that suddenly a hole appears in the ground. This is only Hollywood's version of earthquakes.
- 4) _____
Actually, all over the world; however, the so-called "Ring of Fire", which is around the Pacific Ocean, is probably one of the most active areas in the world.
- 5) _____
Not really, and we certainly can't tell their exact date, time and location in advance.
- 6) _____
Yes. As a result of some human activities such as mining or underground nuclear explosions, there can be small ones.
- 7) _____
Some international websites have lists of earthquakes of magnitude 5.0 and greater, and most countries have their own forums with information on local earthquakes.
- 8) _____
No, they happen at more or less the same rate every year.
