

Comparing Lengths and Heights

There are many reptiles at the Frederick Zoo. The data table shows some of the reptiles and their lengths in centimeters. Use the information in the table to write and solve an equation for each problem. Show your solutions on a separate piece of paper.

Kind of Reptile	Length in Centimeters
American alligator	260 centimeters
Veiled chameleon	53 centimeters
Eastern ratsnake	128 centimeters

1. How much longer is the eastern ratsnake than the veiled chameleon?

The eastern ratsnake is _____ centimeters longer than the veiled chameleon.

2. Which reptile in this table is the longest?

A. American alligator B. Veiled Chameleon C. Eastern ratsnake

3. Which reptile in this table is the shortest?

A. American alligator B. Veiled chameleon C. Eastern ratsnake

4. How much longer is the longest reptile than the shortest reptile?

The longest reptile is _____ centimeters longer than the shortest reptile.
