

GIST LISTENING: There's so much real and fake news about the Corona virus, right now. To help us out, WRITE these four words on a separate piece of paper, then LISTEN (**DON'T WATCH**) ONCE. WHILE listening, CHECK these names and numbers EACH TIME YOU HEAR THEM. AFTER the video, COUNT each of the checks, and use the PULLDOWN menu to CHOOSE the correct total number of checks. **BEWARE!** Nasty neighbors don't want us informed, so they've inserted at least one term that isn't in the video.

SARS

1919

90%

China

(video box, below-to start or stop the video, click in the video box; no other controls)

DETAILED LISTENING: Now get a better idea about the detailed content to give to Ms. Meyer. **READ** these TRUE (T) or FALSE (F) questions TWICE, then *WITHOUT* looking at the questions, **LISTEN** to (**DO NOT WATCH**) the video TWICE, then use the PULLDOWN menu to **CHOOSE** the correct T(RUE) OR F(ALSE) answers *as found in the video*. Ms. Meyer's neighbor has inserted at least one trick question, but Ms. Meyer promises that the questions are not super detailed, so relax! 😊
MAXIMUM 20 MINUTES

1. The Covid-19 virus probably came from a bite by a bat. T | F
2. The most important reason to know where the virus came from is to know who to blame for it, for a court case. T | F
3. The lady interviewed in the TV studio is a virus scientist at an important university. T | F
4. She said that genetic information is not like a bar code. T | F
5. She said it's important to know the origin of viruses to be able to try to avoid similar circumstances and viruses in the future. T | F
6. She said that it's possible that the Corona virus will become a seasonal flu. T | F
7. She said no previous viruses have become cases of seasonal flu. T | F
8. She said that viruses can mutate, but slowly. T | F
