

Linear Functions

Directions: Solve the equations by filling in your portion of the chart just like the first example with the numbers written here for the input and then multiply the 2 by the given number in the parenthesis and then add the number 9 to your answer for the output y.

Name	Input (x)	$2x+9$	Output (y)
Example	3	$2(3)+9$	15
John	18	$2(x)+9$	
Dan	24	$2(x)+9$	
Mike	33	$2(x)+9$	
Amy	19	$2(x)+9$	
Donny	35	$2(x)+9$	
Isabel	41	$2(x)+9$
