

MATH PROJECT UNIT 3

CHAPTER 4

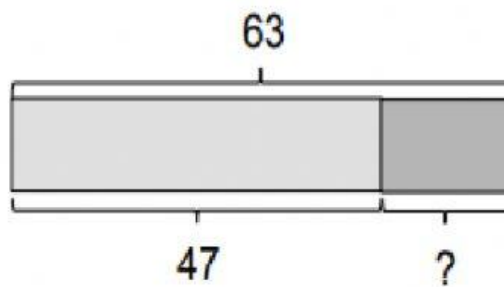

Using Bar Models: Addition and Subtraction

1. Alina helps out in the library every week.
Last week, she shelved 156 picture books and 27 storybooks.
How many books did she shelve altogether?
Show your work.

Alina shelved _____ books altogether.

2. There were 63 books in a box.
47 of the books got damaged due to a water leak
in the library.
How many books were not damaged?

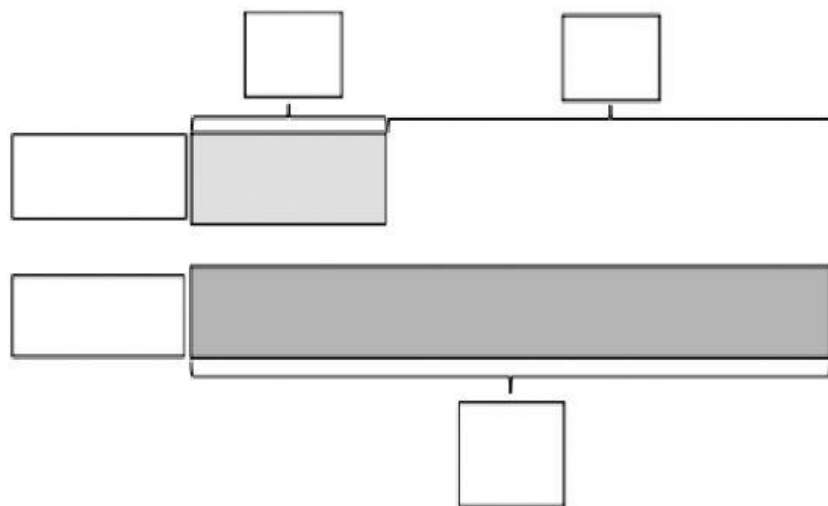

_____ books were not damaged.

3. Alina wrapped 56 books.

The librarian wrapped 183 books.

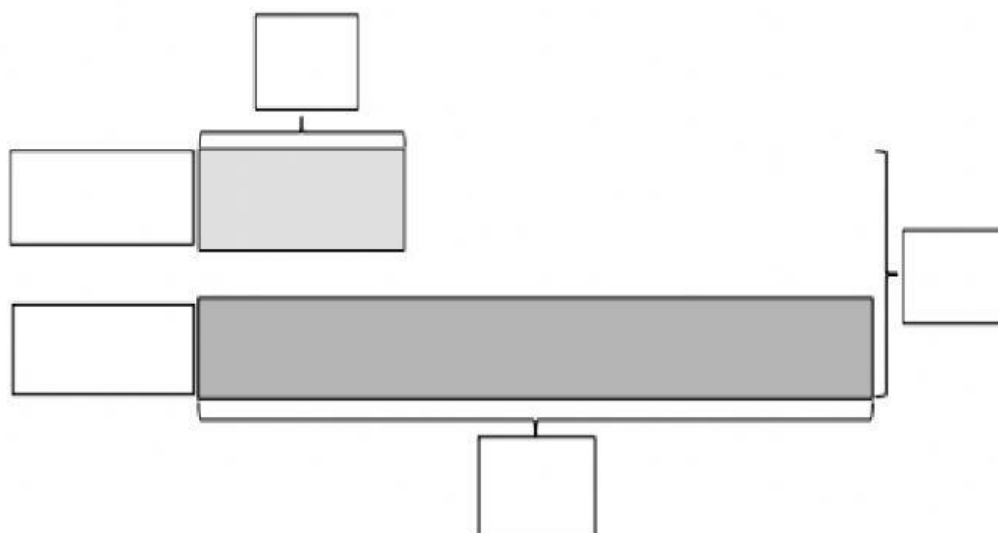

a. How many fewer books did Alina wrap than the librarian?

Use the bar model to help you.

Alina wrapped _____ fewer books than the librarian.

- b. How many books did they wrap altogether?
Use the bar model to help you.

They wrapped _____ books altogether.
