# 7. సమాన భాగాలు - సమాన సమూహాలు

**Class:- IV**

**Subject:- Maths**

Name :-

## I.Solve the following division problems.

**1. A car travels 96 kms in 3 hours. If it travels an equal distance every hour then how much will it travel in one hour?**

Solution :-

Travel distance in 3 hours = 96 kms

Travel distance in an hour = 96 ÷ 3

Travel distance in an hour =      kms

3 ) 9 6 (

_____

_____

_____

**2. There are 648 people in 9 compartments of a train. How many people are there in each compartment?**

Solution :-

648 people in 9 compartments

people in each compartment = 648 ÷ 9

people in each compartment =

9 ) 6 4 8 (

_____

_____

_____

**3. There are 105 lemon plants in 15 rows equally. How many plants are planted in each row?**

Solution :-

105 lemon plants in 15 rows

lemon plants in each row = 105 ÷ 15

lemon plants in each row =

15) 1 0 5 (

_____

_____
