I like Maths and Science, so I enjoyed this biography. It describes Einstein's early life - for example, I didn't know that he couldn't spell. Although he sometimes failed exams at school, he still liked learning about Maths and Science. He became a famous scientist and a Nobel Prize winner! There are some great photographs and the book is easy to read. I thought it was an interesting book. I really enjoyed it.

a

I enjoyed reading this biography. The pictures of all the buildings are fantastic! The language is easy to understand and it's a short book - only 20 pages. There are some beautiful pictures in this book. Sinan's biography is very interesting - he came from a poor family but he became the Chief Royal Architect to the Sultan. It's an amazing true story!

b

I like reading poems and I like stories too. I enjoyed reading about the life of this famous Omani writer. This biography is almost 100 pages long but it's full of information about Al-Farahidi's life and his writing. Some of Al-Farahidi's poems have been included in a section at the back of the book. There are also some lovely pictures in the book. If you are interested in the history of Arabic, you should read this excellent book.

c

Usually I hate reading biographies but I loved this one! He was an amazing musical genius! This book gives lots of interesting information about Mozart's life. For example, when he was only six years old he was playing his violin in many cities in Europe. There is also a section in the book describing Mozart's music. It's a great introduction to the life and music of one of the world's greatest musicians!
