

1. Grupați factorii pentru a calcula mai ușor:

$7 \times 4 \times 1 = \underline{\hspace{2cm}}$

$6 \times 0 \times 9 = \underline{\hspace{2cm}}$

$2 \times 9 \times 5 = \underline{\hspace{2cm}}$

$4 \times 3 \times 3 = \underline{\hspace{2cm}}$

$2 \times 8 \times 4 = \underline{\hspace{2cm}}$

$2 \times 9 \times 3 = \underline{\hspace{2cm}}$

$3 \times 9 \times 3 = \underline{\hspace{2cm}}$

$1 \times 8 \times 9 = \underline{\hspace{2cm}}$

$5 \times 5 \times 2 = \underline{\hspace{2cm}}$

$3 \times 5 \times 2 = \underline{\hspace{2cm}}$

2. Notați în paranteze cu A (adevărat) sau F(fals).

$2 \times 8 = 7 \times 8 \quad (\quad)$

$7 \times 9 > 9 \times 8 \quad (\quad)$

$6 \times 4 < 3 \times 8 \quad (\quad)$

$6 \times 6 > 9 \times 5 \quad (\quad)$

$4 \times 5 < 8 \times 4 \quad (\quad)$

$5 \times 4 > 4 \times 5 \quad (\quad)$

$8 \times 9 = 9 \times 8 \quad (\quad)$

$3 \times 3 < 4 \times 4 \quad (\quad)$

$10 \times 6 > 7 \times 8 \quad (\quad)$

$6 \times 10 < 6 \times 5 \quad (\quad)$

3. Scrieți sub forma de înmulțire următoarele adunări, apoi calculați:

$6 + 6 = \underline{\hspace{2cm}}$

$3 + 3 + 3 + 3 = \underline{\hspace{2cm}}$

$5 + 5 + 5 + 5 + 5 = \underline{\hspace{2cm}}$

$8 + 8 + 8 + 8 + 8 + 8 + 8 = \underline{\hspace{2cm}}$

$7 + 7 + 7 + 7 + 7 = \underline{\hspace{2cm}}$

$9 + 9 + 9 = \underline{\hspace{2cm}}$

$10 + 10 + 10 + 10 + 10 + 10 + 10 + 10 = \underline{\hspace{2cm}}$

$2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 + 2 = \underline{\hspace{2cm}}$
