

Photosynthesis Worksheet

Name: _____

Date: _____

1. Drag and drop the correct parts into the equation.

Diagram illustrating the chemical equation for photosynthesis:

$$6 \text{ [] } + 6 \text{ [gas] } \rightarrow \text{ [] } + 6 \text{ [] }$$

Below the equation, there are four empty boxes for labels, each with an arrow pointing to a part of the equation:

- Box 1 (under the first 6):
- Box 2 (under the gas):
- Box 3 (under the first product box):
- Box 4 (under the second product box):

Below these boxes are two larger empty boxes for labels, each with an arrow pointing to a pair of boxes:

- Box 5 (under the first pair of boxes):
- Box 6 (under the second pair of boxes):

Labels available for drag and drop:

- Sun
- Oxygen Gas
- Glucose
- Water
- Carbon Dioxide
- C₆H₁₂O₆
- H₂O
- O₂
- CO₂

Categories for labels:

- Products
- Reactants

2. Select the correct labels.

A.Busser 2/11/19

Photosynthesis Worksheet

3. Fill in the blanks below.

Photosynthesis is a process that plants use to breathe and to make food. They use the _____ from the sun, along with _____ from the soil and a gas called _____ to make _____, which feeds producers. During this process, _____ is released into the air. This process happens in the _____ of the cell.

4. Answer the following questions.

- What is the waste product that is made in photosynthesis that is useful to humans? _____
- What is the major pigment in plants chloroplasts?

- Photosynthesis is how trees make food. _____

5. Use the table to fill in the blanks below.

Pigments can absorb and reflect different colors of light. Chlorophyll absorbs _____ light. Chlorophyll reflects _____ light. Carotenoids absorb _____ light. They reflects _____ light.

A.Busser 2/11/19

Photosynthesis Worksheet

6. Match the boxes on the right with the two stages of photosynthesis on the left.

Light
Dependent
Reaction

Chlorophyll
captures light

Light
Independent
Reaction

Glucose is
produced

Light
Dependent
Reaction

Energy and
CO₂ is
combined

Light
Independent
Reaction

H₂O is broken
down into
oxygen

A.Busser 2/11/19
