

## Walk the Talk – Start Small

walk – cycle – cars – release – carbon dioxide

energy saving – light bulbs – save money – save environment

plant trees – absorb carbon dioxide – produce oxygen – beautify – air fresh

buy – recycled products – reduce carbon emissions – recycled products – less energy – manufacture

There are many little things we can do in our daily \_\_\_\_\_ that will not cost us much but will certainly make a big \_\_\_\_\_ to our environment. Firstly, walk or cycle instead of driving a car when moving around to buy your newspaper or groceries. Cars \_\_\_\_\_ carbon dioxide into the \_\_\_\_\_. Walking is not only good for the \_\_\_\_\_, it is also good for your \_\_\_\_\_.

environment

Secondly, use \_\_\_\_\_ saving light bulbs instead of normal light bulbs. You may be paying a little more but you are certainly making the environment \_\_\_\_\_. Clean your light bulbs because dirty and \_\_\_\_\_ light bulbs are not \_\_\_\_\_ and make you think you need to \_\_\_\_\_ them with higher \_\_\_\_\_ ones.

Thirdly, \_\_\_\_\_ trees as they \_\_\_\_\_ the carbon dioxide from the air and use it as their energy \_\_\_\_\_, producing \_\_\_\_\_ for us to \_\_\_\_\_. Trees and plants also \_\_\_\_\_ our surroundings and make the air fresh.

Lastly, \_\_\_\_\_ and use recycled products. Products made from recycled paper, glass, metal and plastic reduce carbon \_\_\_\_\_ because they use less energy to \_\_\_\_\_ than products made from completely new materials. We can change our environment by making these small but \_\_\_\_\_ changes in our lives.
