Occasions:

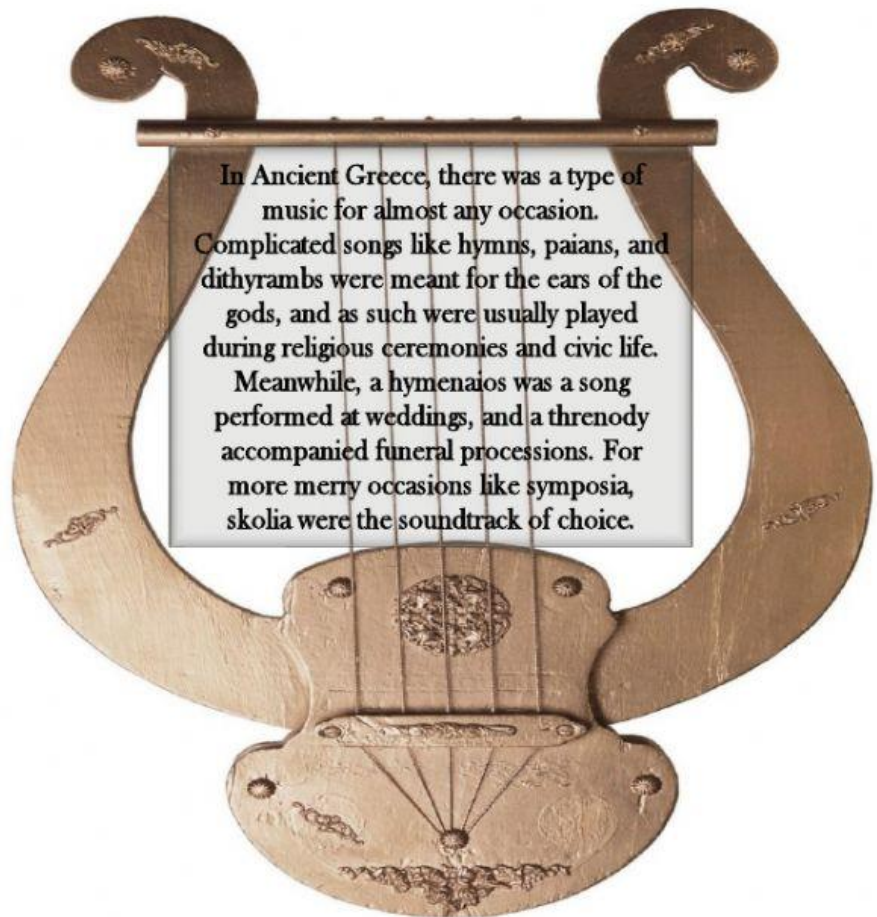

---

---

---

---

---

In Ancient Greece, there was a type of music for almost any occasion. Complicated songs like hymns, paians, and dithyrambs were meant for the ears of the gods, and as such were usually played during religious ceremonies and civic life. Meanwhile, a hymenaios was a song performed at weddings, and a threnody accompanied funeral processions. For more merry occasions like symposia, skolia were the soundtrack of choice.
