

Make sure you type 1 number in each box!!!

(even the boxes on top of the problem)

[illegible]

The image shows four 4x4 grids illustrating the steps to solve a division problem. Each grid has two empty boxes above it for the answer.

- Grid 1:** The problem $7892 \div 2$ is shown. The first row of the grid contains the numbers 7, 8, 9, and 2. The second row contains an 'x' in the first column and a blank space in the fourth column.
- Grid 2:** The first row of the grid contains the numbers 4, 5, and 2. The second row contains an 'x' in the first column and a blank space in the fourth column.
- Grid 3:** The first row of the grid contains the numbers 5, 8, and 3. The second row contains an 'x' in the first column and a blank space in the fourth column.
- Grid 4:** The first row of the grid contains the numbers 6, 8, and 3. The second row contains an 'x' in the first column and a blank space in the fourth column.
