

Ισοδύναμα κλάσματα

Αντιστοιχίσε τα κλάσματα από την αριστερή στήλη με τα ισοδύναμα κλάσματα στη δεξιά στήλη.

$\frac{1}{1}$
ολόκληρο

$\frac{1}{2}$

$\frac{1}{3}$

$\frac{1}{4}$

$\frac{2}{5}$

$\frac{4}{10}$

$\frac{2}{6}$

$\frac{2}{8}$

$\frac{5}{5}$

$\frac{3}{6}$

Παρατήρησε προσεκτικά τα σχήματα. Σχημάτισε
ισοδύναμα κλάσματα, όπως στο παράδειγμα.

$$\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{4}{8} = \frac{5}{10}$$

$$\frac{1}{4} = \frac{2}{8} \quad \frac{1}{5} = \frac{2}{10}$$

$$\frac{1}{3} = \frac{2}{6} = \frac{3}{9}$$

$$\frac{2}{3} = \frac{4}{6} = \frac{6}{9}$$
