The ability to be independent is something that not everyone possesses. (26)\_\_\_\_\_, you need to be independent in order to survive in the world. Learning to support yourself is (27)\_\_\_\_\_ for any success you ever hope to achieve.

At the end of the day, you only have yourself to fall back on, so it is exceedingly important to be able to handle things on your own. It is all about being secure with who you are and what you believe in. It is extremely empowering knowing that you are (28)\_\_\_\_\_ control of your own life and your own choices. It is much more beneficial to listen to the voice inside yourself rather than the berating (29)\_\_\_\_\_ of others.

We rely on others far more than it is necessary. People put their happiness in the hands of a significant other, thinking this will bring them fulfillment. This is a fatal error too many people make these days.

Do you always want to feel dependent on someone else? Of course not. Not only are you limiting yourself, you are more than likely becoming a burden to this person. We need to learn how to make decisions on our own. I understand asking your friends their opinion on a fashion decision, but do we really need to consult others on every minimal decision we have to make? Think of things (30)\_\_\_\_\_ are in your best interest and choose that option.

**Read the following passage and mark the letter A, B, C, or D indicate the correct answer to each of the questions.**

In the near term, the goal of keeping AI's impact on society beneficial motivates research in many areas, from economics and law to technical topics such as verification, validity, security and control. Whereas it may be little more than a minor nuisance if your laptop crashes or gets hacked, it becomes all the more important that an AI system does what you want it to do if it controls your car, your airplane, your pacemaker, your automated trading system or your power grid. Another short-term challenge is preventing a devastating arms race in lethal autonomous weapons.

In the long term, an important question is what will happen if the quest for strong AI succeeds and an AI system becomes better than humans at all cognitive tasks. Such a system could potentially undergo **recursive** self-improvement, triggering an intelligence explosion leaving human intellect far behind. By inventing revolutionary new technologies, such a superintelligence might help us eradicate war, disease, and poverty, and so the creation of strong AI might be the biggest event in human history. Some experts have expressed concern, though, that **it** might also be the last, unless we learn to align the goals of the AI with ours before it becomes superintelligent.

There are some who question whether strong AI will ever be achieved, and others who insist that the creation of superintelligent AI is guaranteed to be beneficial. At FLI we recognize both of these possibilities, but also recognize the potential for an artificial intelligence system to intentionally or unintentionally cause great harm. We believe research today will help us better prepare for and prevent such potentially negative consequences in the future, thus enjoying the benefits of AI while avoiding pitfalls.

**Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions.**

Sixty percent of working Americans today say they've left a job, or considered leaving a job, because they didn't like their direct supervisor, according to a survey from human resource consulting firm Randstad US. Though leaving a job may seem like the best solution for retiring a bad boss, that doesn't mean that it's always the best plan for your career. In fact, if you're in a situation where you love your job and the opportunities it presents, then leaving your role because of a difficult boss may not be the best idea. Pollak and Monster.com career expert Vicki Salemi broke down three ways you can deal with a bad boss without quitting a job you love.

Pollak says that in many cases, a difficult relationship with your boss is often due to differing personalities and habits. One way to mend this relationship, she says, is to closely study your boss's behavior so that you can meet their expectations. “Become the world's leading expert on your boss or your manager,” says Pollak, who is also the author of the book “The Remix: How to Lead and Succeed in the Multigenerational Workforce.” “How does this person like to communicate? If she hates long emails, stop sending long emails. If she doesn't like it when you drop by her office but reacts better when you schedule an appointment, then learn to always schedule appointments instead of **dropping in**. If she is not a morning person, don't ask for things in the morning. If this person is really detail-oriented, then triple check your documents before handing them in.” Salemi agrees. She says that if you have a boss who's critical or a micromanager, often the best way to deal with them is to be proactive in meeting their needs. “It's kind of like you're managing them without making it seem like you're managing them,” she says.

When dealing with a difficult boss, Pollak says one of the best ways to figure out how to successfully work under their leadership is to talk to other people who you know have been in a similar situation. “Other people can be a resource, whether it's a mentor, someone at a different company, a coach or people who have worked for **this person** in the past,” she says. “Treat it as a positive and say, 'I really want to be successful working with X. What recommendations do you have?'” However, she emphasizes, you should never talk about the situation in a negative way, or say you don't like working for your boss. Instead, discuss about the situation in a way that shows your willingness to adapt to make the relationship work.

If talking to other colleagues isn't helpful, then Pollak says one of your last options should be to talk directly to your boss. Consider your approach carefully. Instead of saying, “We're not getting along. What should we do?”, say something to the effect of, “I'd really like to make sure that I'm serving your

needs. I'd like to make sure that I'm communicating in a way that's effective for you and I want to make sure that I'm being as **productive** as possible. Is there anything I can do differently?" This way, she says, you're approaching the situation by asking how you can help, instead of emphasizing a problem.
