Simplifying Fractions

Greatest Common Factor (GCF)

The GCF is the _____ number that is a _____ of two (or more) other numbers

Simplifying Fractions

Find their _____

Divide the numerator (_____) and the denominator (_____) by the GCF

Examples:

Fraction	Factors	Divide	Simplest Form
$\frac{15}{20}$	N: _____ D: _____ GCF: _____	15 ÷ ____ = ____ 20 ÷ ____ = ____	_____
$\frac{4}{16}$	N: _____ D: _____ GCF: _____	4 ÷ ____ = ____ 16 ÷ ____ = ____	_____
$\frac{9}{12}$	N: _____ D: _____ GCF: _____	9 ÷ ____ = ____ 12 ÷ ____ = ____	_____
$\frac{6}{22}$	N: _____ D: _____ GCF: _____	6 ÷ ____ = ____ 22 ÷ ____ = ____	_____
