monstrous

неподвижный вскрикнул блеск терпеть, выносить спрятан
чрезвычайное счастье монстр потому что блестел

Read a brief story about dinosaurs and complete it with English equivalents on the clouds.

It is a существо walking прямо upon трёхпалые feet, and occasionally putting one of its пятипалые передние лапы down on the ground.

Not a bird, but a reptile - динозавр.

Nothing else could have left such след.

There were five of the most необычные creatures: two взрослые and three young ones.

They were огромные. Even детёныши were as big as слоны.

The two adults were bigger than any creatures.

They had цвета сланца skin which had чешую like a lizard's and блестела when the sun shone upon it.

All five were sitting up, balancing themselves upon their широкие, powerful хвосты and their huge three-toed задние ноги.

They pulled down branches with their small five-fingered передние роги.

They looked like кенгуру-монстры, twenty feet в длину, and with кожа like crocodiles.
