

Exit ticket (Lesson 85-86)

Write numerical expressions

Write each phrases as a numerical expression.

1. Divide 15 by 3, then add 13 = $\square \div \square + \square$

Medium

2. Fatma bought 3 bags of apples for her class. One full bag has 8 apples, and each bag weighs 2 kilograms. Write a numerical expression to represent this situation.

Hard

$$\square \times \square \square \square$$
