

EJERCITAR LAS DIVISIONES

Divide los recuadros como se indica y haz las operaciones.

Divide en 3 partes

$$9 \div 3 = \underline{3}$$

Divide en 4 partes

$$12 \div 4 = \underline{\quad}$$

Divide en 2 partes

$$6 \div 2 = \underline{\quad}$$

Divide en 5 partes

$$10 \div 5 = \underline{\quad}$$

Completa como se indica en el ejemplo:

$$4 \times \boxed{2} = \underline{8}$$

$$8 : 4 = \boxed{\quad}$$

$$5 \times \boxed{\quad} = \underline{25}$$

$$25 : 5 = \boxed{\quad}$$

$$9 \times \boxed{\quad} = \underline{18}$$

$$18 : 9 = \boxed{\quad}$$

$$8 \times \boxed{\quad} = \underline{64}$$

$$64 : 8 = \boxed{\quad}$$

$$6 \times \boxed{\quad} = \underline{30}$$

$$30 : 6 = \boxed{\quad}$$
