

The map shows the topography of Canada with color-coded elevation: green for lowlands, yellow for moderate elevations, and brown/orange for high mountains. Red dots are scattered across the country, with a higher concentration in the western and central regions. Red-outlined boxes are placed over specific areas: one in the northwest (Alberta/Saskatchewan), one in the west (British Columbia), one in the central prairies (Saskatchewan/Manitoba), one in the Great Lakes region (Ontario/Quebec), one in the St. Lawrence Valley (Quebec), one in the Atlantic provinces (Nova Scotia/Prince Edward Island), one in the Gulf of St. Lawrence (Quebec), one in the northern Yukon, and one in the northern Northwest Territories.
