Finally, a Revolutionary Solution to Overcome Common Language Learning Problems

In Japan, instant translators have been used in schools for well over a decade now and that's exactly where **MUAMA Enence** was born. Developed by a strong team of engineers and teachers, it was designed to perfection with common language learning problems in mind. Here are a few of them:

1. _____

This is probably the most common issue. Say goodbye to the hassle of having to look up a word every time you forget it - just say it to MUAMA Enence and it will instantly say it back to you!

2. _____

Using the right word in a wrong context or using a word in a way that makes sense can be hard when starting out. With MUAMA Enence you can easily increase your exposure to native speakers, which is essential if you want to be proficient.

3. _____

Speaking of children, another noteworthy problem is having to hire a good tutor if a child is falling behind with their language classes in school. **MUAMA Enence** requires just a one-off payment and can help your child improve their skills significantly. Since the news about MUAMA Enence came out, parents were buying them like crazy! It's much more affordable than paying for being tutored.

4. _____

Only by interacting with native speakers non-stop you start picking up their pronunciation. However, a lot of people don't have the courage to speak to strangers as their fear of forgetting words, making awkward silences and looking stupid usually comes in the way.With MUAMA Enence you don't need to look for people to be able to speak in their language. All you need is just a few finger taps. If MUAMA Enence understands you - anyone will!

5. _____

In the past decade, the quantity and availability of technology for use in the classroom has skyrocketed. Japan has been doing it for a while now so why not follow the good example? **MUAMA Enence** is so easy to use that it's beneficial for people of all ages. Just as a calculator is a valuable tool for helping students build proficiency in mathematics, there is also the possibility for MUAMA Enence to support learning in the foreign language at either home or a classroom. So, why not?
