

Jan. 11-15 Secondary Succession (liveworksheet)

Directions: Draw a line to connect each stage of secondary succession with its description. The first one has been done for you.

Phase 1

Phase 2

Phase 3

Phase 4

Phase 5

Intermediate species like grasses, shrubs, pines, young oak and hickory grow tall

Ecological disturbance (in this case, a fire)

A climax community is reached as a mature forest has developed

Grasses and perennials begin to grow

Pioneer species, like annual plants
