UNIT 3 : ANIMALS

Teacher Laura

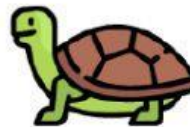

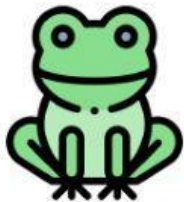

Vertebrates all have a skeleton

Invertebrates do not have a skeleton

Classify the following animals into vertebrates or invertebrates:

UNIT 3 : ANIMALS

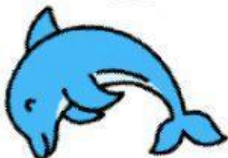

Teacher Laura

Look!  bats,  dolphins and  whales are mammals

Look!  penguins are birds.  Humans are mammals

Classify the following animals into birds, mammals, amphibians, fish or reptiles

UNIT 3 : ANIMALS

Teacher Laura

There are many types of invetebrates:

soft bodies exoskeleton shells wings

exterior skeleton

Classify the following invertebrates into soft body, exoskeleton, shell or wings:

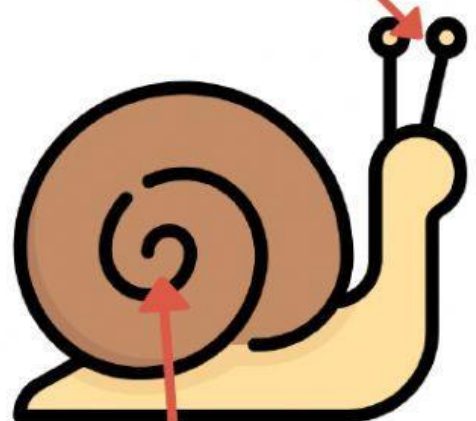

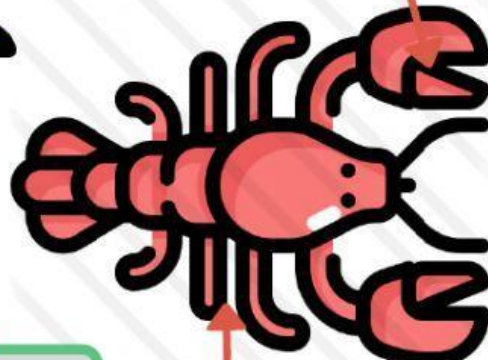

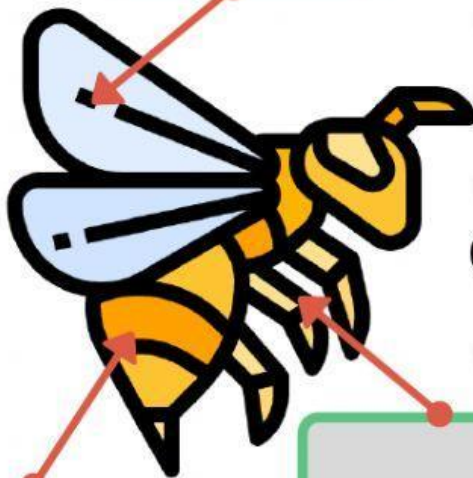

Label these parts:

wing claw legs legs shell antennae

UNIT 3 : ANIMALS

Teacher Laura

Animals have different body coverings.

feathers

fur

bare skin

scales

Classify the following animals according to their body covering

UNIT 3 : ANIMALS

Animals eat different foods

Some animals eat plants

herbivores

flat teeth

Some animals eat other animals

carnivores

sharp teeth

Some animals eat animals and plants

omnivores

both sharp and flat teeth

Classify the following animals into herbivores, carnivores or omnivores

How do animals reproduce?

oviparous

They are born from eggs.

The babies grow inside the eggs.

viviparous

They are born from their mother's body.

They grow inside their mother's womb.
