## 2 DRASTIC PLASTIC: POLLUTING OUR OCEANS

Can you see all these small  of plastic? They are often found in the  of turtles. Like many  turtles confuse plastic with food. In the ocean, plastic bags look similar to  and small pieces of plastic can look like fish eggs.

Greenpeace, more than 100,000 sea creatures and a million sea birds die every year after eating plastic or  in plastic  Sometimes, when baby turtles get trapped in plastic the shape of their  changes when they grow. Some sea creatures make their homes in plastic rubbish, such as the  that live on

This is  countries work together to clean up the oceans? People  want to take responsibility for it but we  that this is a  problem!

Every year, the world produces more than 300 million  of plastic! In the next minute while you're reading this paragraph, people around the globe will use more than a million plastic bags and they'll throw away more than a million plastic bottles.  About 10% of it will be  and some will go  but a lot of it will end up polluting the oceans. Experts  that there are already 200 million tonnes of plastic in the world's oceans, and this will increase by about 7 million tonnes every year.

Because plastic isn't  it won't  naturally, so all the plastic that we have now in the world will exist forever. That means we'll need to clean up the oceans if we want to protect our sea creatures.  if we don't use so much plastic.  in the ocean! Experts are warning that if we don't take urgent action, there might be more plastic than fish in the sea by 2050.

GreenGirl 2 hrs ago

bin after reading this. And I won't use so many plastic bags!

Answer the questions about the listening:

1. What is the problem that plastic causes?

2. What is our role in the problem?

3. What is the size of the problem?

4. What can we do about it?

3 Grammar: 1st conditional: <https://youtu.be/J7EQd2Rft38>. Use 1st Conditional below

we produce greenhouse gases	→	the climate gets hotter	→	the ice melts at the North and South Poles	→	the sea level rises	→	there are terrible floods around the world	→	people lose their homes and their lives
-----------------------------	---	-------------------------	---	--	---	---------------------	---	--	---	---

  

<p>If we pollute the air with fossil fuels, we (1) <input type="text"/> greenhouse gases. The climate (2) <input type="text"/> if we produce greenhouse gases. If (3) <input type="text"/> hotter, the ice (4) <input type="text"/> at the North and South Poles. If</p>	<p>the (5) <input type="text"/> at the North and South Poles, the sea level (6) <input type="text"/>. There (7) <input type="text"/> terrible floods around the world if (8) <input type="text"/>. People (9) <input type="text"/> their homes and their lives if (10) <input type="text"/> terrible floods.</p>
