There Are Many Chores at Our Family's Organic Farm!

At five thirty in the morning, we milk the cows. At six ten, we feed the chickens and collect the eggs. At six forty, we make the butter. At seven fifty, we pick the vegetables. At eight twenty-five, we take the butter and vegetables to the farmers' market. We brush the sheep and collect the wool at eight thirty. At nine fifteen, we make the compost. We use leaves and organic garbage. We put fresh compost in the garden at nine forty-five. It makes the plants grow healthy and strong!
