

## Writing activity

- Read the text. Find 6 mistakes and rewrite the text in the box below.

have you ever had an earache after swimming When you swim, water enters your ears. Sometimes, water stays in one of your ears and and makes the area wet. Germs called bacteria can grow in wet places. When water stays in your ear for a long time, germs grow there. That makes your ear hurt. When this happens, you shouldn't visit the Doctor to make your ear better
