1 March 6th

Dear Detective Logan,

5 I am Megan O'Neill and I know that you are investigating my husband's murder. I was in the apartment when Brian was shot dead. I know that I look suspicious to you because I disappeared but I promise I did not kill my husband.

10 I heard some noise coming from the living room but at first I didn't realise that he was being attacked. Then I heard a gunshot so I ran away as quickly as possible, as discreetly as possible. Please believe me, I loved Brian very much and I'm devastated.

Megan

1. Identify the addresser (= expéditeur) of the letter.

2. Do you remember her relationship with Brian, the victim ?

3. Identify the addressee (= destinataire) of the letter.

4. Identify the job of the addresser ?

5. Relis la lettre en gardant en mémoire le métier de l'expéditeur. Remarques-tu quelque chose d'étrange ?

6. Pay attention to this « problem » and decipher (= déchiffre) the encrypted message (=message codé). What does this message say ?

7. Fais quelques recherches sur ce message codé et explique de quoi il s'agit.

8. Now that you know the addresser saw the killer and that you have discovered the encrypted message. Make some hypotheses about the identity of the killer.

9. Après avoir lu cette lettre, ré-écoute l'enregistrement qui était joint à la lettre et essaye de faire à nouveau l'activité :
