

Date: _____

This week we started our unit on magnets. One of my favorite things about this unit is how much you can explore. For homework tonight, find a magnet around your house. A great place to look is right on your refrigerator! Remember magnets come in all shapes and sizes. Using this magnet explore your house to see what is magnetic (attracts the magnet) or non-magnetic (does not attract your magnet).

Magnetic	Non-magnetic
Ex: refrigerator	Ex: wooden trash can
