

| COLUMN-A | COLUMN-B |
|--------------------------------------|--------------------|
| A number x increased by 5 | $\frac{x}{5} + 3y$ |
| The sum of x and y | $x - y$ |
| 2 more than 3 times x | $2x + 3y$ |
| One fifth of x added to 3 times of y | $5b + 3a$ |
| Product of a and b added to 5 | $y - x$ |
| 5 times of b added to 3 times of a | $x + 5$ |
| Difference of x and y when $x > y$ | $5 - x$ |
| Difference of x and y when $x < y$ | $x + y$ |
| Two times of x added to 3 times of y | $3x + 2$ |
| X less than number 5 | $ab + 5$ |
