

## Chapter 5 – Lesson 2

### Metals, Nonmetals and Metalloids

Match the scientific term with the definition:

**1. Luster**

A. Heat flow in metals

**2. Heat conductor**

B. It can be **shaped, bent or hammered** without breaking

**3. Ductility**

C. Shinny

**4. Electricity conductor**

D. Can be drawn into **thin wires** without breaking

**5. Malleability**

E. Electricity flow in metals

**6. Solid**

F. Most metals are **solid** except mercury
