Lesson: Multiplying Fraction

1) $5/8 \times 1/8 =$

Step 1: Multiply the top numbers (the numerators).

$$\frac{5}{8} \times \frac{1}{8} =$$

$$\underline{\quad} \times \underline{\quad} = \frac{\mathbf{x}}{\mathbf{x}}$$

Step 2: Multiply the bottom numbers (the denominators).

$$\underline{\quad} \times \underline{\quad} = \frac{\mathbf{x}}{\mathbf{x}} = \underline{\quad}$$

Step 3: Simplify the fraction (if needed)

$$\underline{\quad} = \underline{\quad}$$

$$2) 2/4 \times 3 \frac{1}{2} =$$

Step 1: Multiply the top numbers (the numerators).

$$\frac{2}{4} \times 3 \frac{1}{2} =$$

$$\underline{\quad} \times \underline{\quad} = \frac{\mathbf{x}}{\mathbf{x}}$$

Step 2: Multiply the bottom numbers (the denominators).

$$\underline{\quad} \times \underline{\quad} = \frac{\mathbf{x}}{\mathbf{x}} = \underline{\quad}$$

Step 3: Simplify the fraction (if needed)

$$\underline{\quad} = \underline{\quad}$$
