

Function Tables

Function Tables

A function table has values of _____ and _____ and a function rule.

In the function rule, if we substitute in values for the _____, we get corresponding values of _____

Complete each function table

$f(x) = x - 4$	
x	$f(x)$
-10	
-5	
0	
5	

$g(x) = 15 - 6x$	
x	$g(x)$
0	
1	
2	
3	

Evaluate each function from the table

x	-4	2	7	10	$f(-4) = \underline{\hspace{2cm}}$
$f(x)$	6	11	0	14	$f(x) = 0, x = \underline{\hspace{2cm}}$

x	5	8	13	19	$f(19) = \underline{\hspace{2cm}}$
$f(x)$	37	-13	-55	22	$f(x) = -55, x = \underline{\hspace{2cm}}$
