

DINOSAURS

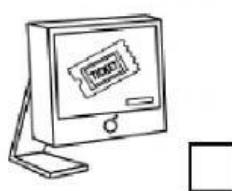

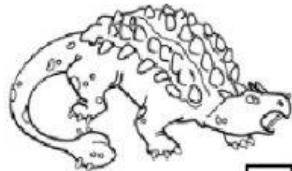

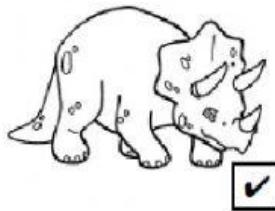

Read and mark (✓) the correct pictures.

They're Back After 65 Million Years!

Imagine that you are in the jungle and you see something enormous moving behind the trees. Suddenly, it walks towards you. It's very big. It has a long tail, a beak and three horns. Don't worry! It isn't a carnivore.

All this is possible in the spectacular show *Walking with Dinosaurs*. You can watch them walk and hear them roar. Designers and scientists worked together to create 15 life-size dinosaurs, including the carnivorous allosaurus, the herbivorous brachiosaurus, and even a baby T. Rex.

Check show times and buy tickets online at www.walkwithdinos.com. Buy one ticket for an adult and get one free child's ticket. What are you waiting for? Make sure you see the return of the dinosaurs!
