

Label the water cycle.

Condensation

Precipitation

Evaporation

## The Water Cycle

- 1) When water evaporates from the leaves of plants and trees, this is called \_\_\_\_\_.
- 2) \_\_\_\_\_ happens when water vapour cools as it rises in the atmosphere, and turns back into tiny water droplets forming clouds.
- 3) When water droplets in the clouds become heavy and fall to earth as rain, hail or snow, this is called \_\_\_\_\_.
