B. Reading Comprehension – The Most Popular Sport in America**Listen to the text:**

Can you guess the most popular sport in America? It's not baseball or basketball. It's football!

Football was first played in the 1860s. It started as a combination of soccer and rugby. In football, two teams play against each other. They play using a ball that is shaped like an oval. The teams play on a field that

has a goal post at each end. Eleven players from one team are on “offense.” They try to move the ball toward one of the goal posts. They do this by throwing and catching the ball. They can also do this by running with the ball. Eleven players from the other team are on “defense.” They try to stop the team on offense from moving the ball. If the team on offense gets the ball all the way to one end of the field, that team scores points! The team with the most points after sixty minutes wins the game.

There are thirty-two teams in professional football. At the end of the football season, each team tries to prove that it is the best by winning the last game of the year. That game is called the Super Bowl. You may have heard of it. You may have even watched it. A lot of people watch the Super Bowl to see which football team wins. A lot of other people watch it to see the musical performance that happens in the middle of the game. The Super Bowl is so popular that it is the most watched television program in the country!
