

Name: _____

Class: _____

12. Find the Product of Multiplication

A. Visual learning

 $3 \times 2 = ?$	
We can use model.  So $3 \times 2 = 6$	Or we can use the repeated addition. 3 times 2 $2 + 2 + 2 = 6$ So $3 \times 2 = 6$
Each number in the multiplication has a name. $\begin{array}{ccc} & 3 \times 2 = 6 & \\ \nearrow & & \uparrow \\ \text{factors} & & \text{product} \end{array}$	

B. Vocabulary

group: <u>nhóm</u>	repeated addition: <u>phép cộng lặp</u>
factor: <u>thừa số</u>	product: <u>tích</u>

C. Independent practice

1. Choose the correct answer. $4 \times 2 =$ _____

A. 

$$4 \times 2 = 8$$

B. 

$$4 \times 2 = 8$$

Choose the model then find the product.

2.

$$2 \times 7 = \underline{\hspace{2cm}}$$

3.

$$3 \times 4 = \underline{\hspace{2cm}}$$

4.

$$5 \times 3 = \underline{\hspace{2cm}}$$

5. There are 4 boxes.

Each box has 5 cakes.

How many cakes are there in all?

a/ Choose the correct model.

A.

B.

b/ Write the numbers.

$$\underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

There are cakes in all.
