Tasks

Part A: Equivalent Fractions

Fill in the gaps to complete the equivalent fractions

(1) $\dfrac{2}{3} = \dfrac{\square}{6}$	(2) $\dfrac{3}{5} = \dfrac{9}{\square}$	(3) $\dfrac{5}{7} = \dfrac{60}{\square}$
(4) $\dfrac{7}{2} = \dfrac{\square}{8}$	(5) $\dfrac{6}{\square} = \dfrac{36}{66}$	(6) $\dfrac{1}{\square} = \dfrac{8}{80}$

Part B: Simplifying Fractions

Write the fractions in their simplest form

(1) $\dfrac{3}{6} = \dfrac{\square}{\square}$	(2) $\dfrac{10}{24} = \dfrac{\square}{\square}$	(3) $\dfrac{6}{9} = \dfrac{\square}{\square}$
(4) $\dfrac{20}{45} = \dfrac{\square}{\square}$	(5) $\dfrac{2}{16} = \dfrac{\square}{\square}$	(6) $\dfrac{20}{90} = \dfrac{\square}{\square}$
