Instructions: (1) Read the following paragraph from the text and answer the questions below. Type the letter of the correct answer in the space provided.

With the help of his father and brother, Perkin set up a factory not far from London. Utilizing the cheap and plentiful coal tar that was an almost unlimited by-product of London's gas street lighting, the dye works began producing the world's first synthetically dyed material in 1857. The company received a commercial boost from Empress Eugenie of France, when she decided the new color flattered her. Very soon, mauve was the necessary shade for all the fashionable ladies in that country.

Very soon, mauve was the necessary shade for all the fashionable ladies in that country.

Key Word Identification Chart

Names	Dates	Places

Instructions : (3) Read the paragraph and choose the answer that best states the topic.

_____ Clothes today are very different from the clothes of the 1800s. In the 1800s most clothes were not very colorful. They were dyed with juice from vegetables or other plants which would fade over time. Today, clothes are colorful, thanks to William Henry Perkin and his discovery of synthetic dye. Now, colorful clothes are easily affordable for everyone, not just the rich. When you are shopping in stores today you will see many brightly colored clothes that are both beautiful and affordable.

- a. The invention of synthetic dye
- b. Discoveries of William Henry Perkin
- c. Changes in the production of clothing over the centuries
- d. Differences between modern clothing and past clothing
