

TRUE OR FALSE!

1. Energy is the ability to do work, cause motion or position.

2. We can create and destroy energy.

3. Sound, Electrical, and Temperature are types of energy.

4. Kinetic energy is energy in motion.

5. Electrical energy is produced when an object vibrates.

6. Kinetic and Potential are types of chemical energy.

7. Non-renewable energy sources can be replaced easily.

8. A person climbing a tree is Potential Energy.

9. The Sun produces Radiant Energy.

10. Crude oil, Natural gas, coal and wind are examples of non-renewable energy sources.

TRUE OR FALSE!

11. In Photosynthesis plants produce Sound energy.

12. Reduce means to use less and produce less waste .

13. When you donate toys that you don't longer play with you are recycling.

14. The Three R's of the environment are Reduce, Renew and Recycle.

15. Renewable energy sources are eco-friendly for our planet.

16. A car engine changes chemical energy to mechanical and heat energy.

17. A lamp changes electrical energy to sound energy.

18. Light or Radiant energy is transmitted by waves.

19. Energy stored in matter is Kinetic energy.

20. Geothermal energy is heat that comes from the inside of the Earth.
