Label the process of photosynthesis.

Circle the correct answers about plant nutrition.

a. How do plants get their energy? (They make their own food) They eat other plants

b. What do we call this <u>process</u>? Fertilisation / Photosynthesis / Pollination

c. What do plants absorb from the air? Oxygen / Carbon dioxide / Minerals

d. What else do plants need for this process? Sunlight / Darkness / Moisture

e. What do plants release into the air? Oxygen / Carbon dioxide / Water

Complete the equation for photosynthesis.

water + minerals + _____ + sunlight = food + _____
