Form 4 Subject Choices 2023-2024

The Subject Selection Process

This guide will contain some reminders for parents/guardians and students of the process for selecting CSEC subjects:

- Each student will pursue a minimum of seven (7) subjects in the Form 4 year unless he/she has a documented condition which requires a reduced curriculum.
- Students will automatically be assigned to pursue English A and Mathematics as these are compulsory subjects. They have a choice of five other subjects they would like to pursue.
- Students are allowed to select one subject from each numbered/horizontal line (numbers 3 to 7). These subjects are placed against each other on the F4 timetable so they cannot be selected together. For example on line 3, Add Math and Spanish will be taught at the same time. Therefore, the student must do one of the subjects but cannot do both.
- Some subjects (Add Math, Biology, Chemistry and Physics) have a pre-qualification mark. Students must earn a minimum of 75% annual average mark in the F3 year in order to pursue these subjects. *Subject teachers in these areas have provided students with the minimum mark they must achieve in the End of Term exams in order to pursue these disciplines*.
- Students who wish to pursue the foreign languages are expected to have a qualifying grade in each assessment in the F3 year and to have a minimum of 70% in English Language.
- There is a limited number of students who can pursue Technical Drawing. The class is capped at 12 students. Consideration is given to those students for whom this subject is directly linked to their current career pursuits.

Student's Name: _____ **Student's Class**: _____

Place a 'Y' in the box after the CSEC subject you would like to pursue in the new academic year. Select a minimum of 7 subjects. Only one subject can be selected on the same numbered line.

No.	Subject					
1	English Language	Y	Compulsory Subject (pre-selected)			
2	Mathematics	Y	Compulsory Subject			
3	Additional Math		Spanish		Social Studies	
4	English B		Geography		Principles of Accounts	
5	Biology		French		Human & Social Biology	
6	Principles of Business1		Physics		Visual Arts	
7	Principles of Business2		Chemistry		Information Technology	
8	Technical Drawing *		Only offered after school (Tues & Thurs)			

* Please note that for Technical Drawing each student must have a functioning personal laptop with the required specs to install AutoCAD student version.
