

B. Read and choose the correct answer.

Collecting Coins

People collect a lot of different things.

Some people collect dolls for example, and others collect comics or stamps.

But some people also collect coins. Not the kind of collection that means you are saving to buy something, but rather, a collection that is about the joy of finding and keeping interesting things. Even hundreds of years ago, people collected old and interesting coins as a form of art. Sometimes, they gave them to friends at festivals and other special occasions.

Now, people collect coins for different reasons. However, the most popular coins

to collect are rare coins, coins with mistakes such as an incorrect date or picture, or coins that were only made for a short time, so there are only a few in existence.

Coin collectors often keep their coins in albums, or put them in special frames and hang them on the wall.
