

2 Making comparisons How do parts of the human body resemble other things? With a partner, match the parts of the body with the items. Then discuss in detail how each body part is like the matched item.

Body Parts	Items
1. brain	A scissors
2. eye	B computer
3. liver	C crane
4. nervous system	D pump
5. teeth	E water filter
6. arm	F camera
7. heart	G electrical circuits

The eye can be compared to a camera: both automatically focus for short and long distances and adjust the amount of light that enters the lens.
