X-rays

Example

When someone breaks an arm or leg, they need to go to hospital to have an x-ray. An x-ray is a special kind of photo

1 helps doctors to see inside a person's body.

2 Dentists use x-ray machines to fix problems.

X-ray photos can show the dentist where there are any broken teeth or
3 teeth that have holes in

4 A man called Wilhelm Rontgen invented the x-ray machine the end

5 of the 19th century. The first x-ray that he
was of his wife's hand. Rontgen won prizes for his important new idea.

6 People used x-rays to help shoes in the middle
of the last century, too. They used the machine to help them choose the

7 shoes.

8 We find x-ray machines in shoe shops now,

9 but they are in airports. These machines look

10 inside rucksacks and bags that people take
on planes.
