

What can we find out about Europe?	
What is the name of the landmass that cannot be seen today?	
Where can it be found?	
What size is Doggerland thought to have been?	
When did Doggerland supposedly disappear?	
When might have Doggerland been the richest hunting ground in all of Europe?	
What causes might have there been of Doggerland disappearing?	
When did this happen?	
Was the rising of sea levels the only reason of Doggerland's submersion?	
What other causes were there?	
What caused these?	
Where did the sunken land get its name from?
